ELECTION/RESTRICTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-19, drawn to electrical connections of an ink jet head, classified in class 347, subclass 50.
- II. Claims 20-26, drawn to a method of fusing a connector member to a bonding pad, classified in class 29, subclass 877.

2. The inventions are distinct, each from the other because of the following reasons: Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the ink jet head connection unit can be made by another and materially different process. In the instant case, the process as claimed can be used to make an IC chip for a semiconductor device.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
